[Guide to Buying Your First Bass Guitar | School of Rock](#)

A bass amplifier or "bass amp" is a musical instrument electronic device that uses electrical power to make lower-pitched instruments such as the bass guitar or double bass loud enough to be heard by the performers and audience. Bass amps typically consist of a preamplifier, tone controls, a power amplifier and one or more loudspeakers ("drivers") in a cabinet.

The bass guitar plays an indispensable role in any band. Together with the drummer, you and your bass create the pulse of each song you play. Your bass amplifier cabinet is a vital link in fulfilling that role, containing the speakers that give your bass its voice. The principle of bass amplifier cabinets is simple: boxes with speakers in them.
