Science curriculum doesn't have to be expensive. A good portion of what we've used for science over the years have been free resources! I remember science being incredibly dry and boring in school and I want my children ' s science experience to be anything but boring. Because of that, I seek out resources that offer learning through living books and lots and lots of experiments.

Part Two: Lab. This component builds upon the theory portion of the CNA classes through in-person skills practice. Some of the skills you will perform with the assistance of your fellow students and instructor include personal care (bathing, feeding and grooming), positioning the patient, transferring the patient, and taking vital signs such as blood pressure.
