Opium (or poppy tears, scientific name: Lachryma papaveris) is dried latex obtained from the seed capsules of the opium poppy Papaver somniferum. Approximately 12 percent of opium is made up of the analgesic alkaloid morphine, which is processed chemically to produce heroin and other synthetic opioids for medicinal use and for the illegal drug trade.The latex also contains the closely related ...

Opium for the Masses. gives an overview of the world history of opium and then the US war on drugs (which began by outlawing opium as America's first 'illicit substance' in 1914, under the Harrison Act), but most of the book is filled with practical how-to information, and very detailed at that. One section I found fascinating was the ...
