Web Services - Concepts, Architectures And Applications ...
Concepts, Architectures and Applications. Usually dispatched within 3 to 5 business days. Usually dispatched within 3 to 5 business days. Like many other incipient technologies, Web services are still surrounded by a tremendous level of noise. This noise results from the combination of wishful thinking on the part of research and industry and a lack of clear understanding of how Web services came to be.

Web Services - Concepts, Architectures and Applications ...
Loosely Coupled – Loosely coupled means that the client and the web service are not bound to each other, which means that even if the web service changes over time, it should not change the way the client calls the web service. Adopting a loosely coupled architecture tends to make software systems more manageable and allows simpler integration between different systems.

What are Web Services? Architecture, Types, Example
